**Subject:** Qatar Airways - Electronics Ban Update

## Your electronic devices are welcome on board again

Qatar Airways is pleased to confirm that all personal electronic devices are now allowed to be carried on board all flights from Hamad International Airport, Doha, to destinations across the United States.

Qatar Airways and Hamad International Airport have met all of the requirements set by the US Department of Homeland Security's new security guidelines.

We would like to express our thanks to the local authorities in the US for their support and our loyal passengers for their patience and understanding.
